

Abstract of the Disclosure

WATER- AND OIL-REPELLENT, ANTISTATIC COMPOSITIONS

A water- and oil-repellent, antistatic composition comprises (a) at least one  
5 polymeric salt consisting of (i) at least one cation having at least one polyoxyalkylene  
moiety bonded to a cationic nitrogen center, and (ii) at least one weakly coordinating  
anion, the conjugate acid of the anion having an acidity greater than or equal to that of a  
hydrocarbon sulfonic acid; (b) at least one fluorochemical repellent; and (c) at least one  
insulating material. The composition exhibits good antistatic and repellency

10 characteristics.
